

What is transitionalREALITY?

While video games were once relegated to the realm of recreation and fun, these days gamification has become a highly effective tool for training and education. Throughout these experiences, your employees can gain vital knowledge in an engaging, immersive environment. Making a commitment to this revolutionary training technology will demonstrate to your workforce that their safety, health, and skill is always a top priority.

All of trainPOINT's content is developed in-house by our team of training, EHS, and development professionals. These serious games allow a 90 minute powerpoint to be converted to a 3-5 minute micro-learning course.

trainPOINT's mission is to give organizations the tools they need to be flexible and grow their training programs to ensure a safe, productive, and OSHA-compliant workplace.

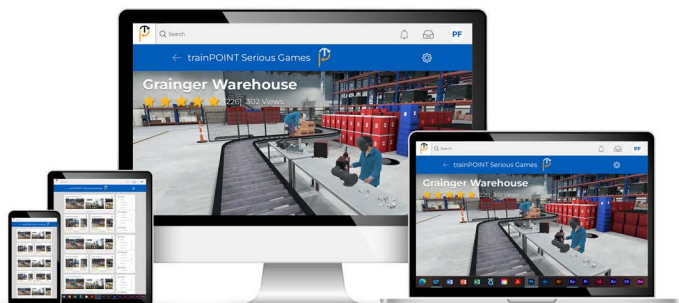

EXPERIENCE THE FUTURE OF TRAINING.

INDUSTRIES WE SERVE:

- Research & Development
- Aerospace
- Manufacturing
- Chemical Processing
- Life Sciences
- Automotive
- Utilities
- Construction
- Food & Agriculture
- Oil & Gas

LAUNCH ON ANY MOBILE DEVICE

- COST EFFECTIVE
- CONVENIENT
- REDUCED RISK
- AVAILABLE 24/7

REAL EXPERIENCES >>

Our fully immersive virtual reality courses will provide the benefits of hands on training while solving many of the logistical & financial challenges associated with large scale simulated training exercises. Through these courses, your workforce will have the benefit of meaningful hands-on training pertaining to job skills applicable in the workplace.

This will allow your organization to deploy your training curriculum and procedures globally while avoiding costly mistakes that can be made when employees are trained on real machinery. These "Real Experiences" nurture an emotional connection to the training materials that have a lasting impact on muscle memory & retention.
